

## Container Management

*gwiTrack<sup>SM</sup> from Gulf Winds is a complete container management system that will be an integral part of your supply chain management nationwide. By tracking shipments from origin to final destination, gwiTrack provides detailed monitoring, tracking and management tools for your container shipping efforts.*

### Information Management

Gulf Winds receives information from an extensive network of steamship lines, rail lines, port terminals and trucking firms all across the United States and manages this information in gwiTrack. Using state-of-the-art technology and an easy-to-use online dashboard, gwiTrack provides a resource that delivers the information you need to take complete control of your supply chain activities.

# Import Management

**Demurrage Management** – Notification when the container is ready for pick-up at the port or rail, and when storage charges will begin to accrue. Demurrage management saves shipping costs by eliminating dry runs when the container is not ready and storage charges accrue if the container is not picked up in time.

**Hold Monitoring** – Notification of any holds or delays at the port that will impact release of the container or affect demurrage charges.

**Per Diem Management** – Tracking of steamship line per diem tariffs, with automatic notification when the cargo needs to be unloaded from the container. When containers need to be held beyond the free time allowed by the steamship companies, gwiTrack will calculate the per diem costs to provide the information required to make the best financial decision regarding storage of the cargo.

gwiTrack also provides tracking of custom contract terms with steamship lines for each shipment to manage cargo drops and avoid per diem charges specific to each shipment.

**ETA Management** – In addition, Gulf Winds provides tracking of incoming rail and port cargo to minimize yard pull and storage costs. gwiTrack's ETA Tracking feature monitors incoming containers, providing the data needed to determine labor ordering or amount of containers to receive per day.

Current Orders					
<b>Imports</b>	<b>1365</b>	<b>Exports</b>	<b>56</b>	<b>Domestic / Repo</b>	<b>29</b>
Not Arrived	952	On Hold	0	Available for Delivery	1
Arrived	145	Available for Loading	0	Scheduled for Delivery	27
On Hold	40	Scheduled for Loading	7	Dispatched	1
Available for Delivery	105	Dispatched	49		
Scheduled for Delivery	166	Rolling Cutoffs	0		
Dispatched	105				

Monitor inbound imports from Port of Origin to Port of Discharge. Track holds and see when your containers are available for delivery.

Delivery Schedule	M	Tu	W	Th	F	S	Su	Total
<b>09/05 - 09/11</b>	0	84	115	135	188	1	0	523
Not Dispatched	0	0	0	0	99	0	0	99
No Outgate	0	0	0	0	28	0	0	28
<b>09/12 - 09/18</b>	49	44	8	8	0	0	0	109
Not Dispatched	39	39	8	8	0	0	0	94
No Outgate	1	0	0	0	0	0	0	1

The visibility of inbound container schedules, along with what has been dispatched and outgated, enables your receiving personnel to properly plan inbound cargo flow so you can efficiently allocate resources to minimize costs.

Tracking	4+	3	2	1	0	<0	Total
ETA	654	75	65	64	61	31	950
Rail/Port LFD	184	89	7	7	28	4	319
Doc Cutoff	2	5	0	0	0	0	7
Cutoff	52	0	0	0	0	0	52
Per Diem	115	15	0	0	3	3	136
Whse LFD	0	0	0	0	0	24	24

With real-time ETA's, your distribution center can proactively plan inbound inventory, optimize labor, and offer improved inventory management.

Dropped Containers	
Dropped	121
GWI	26
Customer	95
Drop Released	19

By reconciling what has been dropped at any given location, we can efficiently manage per diem charges and minimize yard congestion.

# Export Management

**Booking Management** – gwiTrack monitors the booking and automatically sends notification of updates to Gulf Winds personnel. This includes:

- Matching shipping documents to port records to identify and resolve any issues prior to delivery.
- Notification when the containers are turned in at the port and rail terminals.
- Notification of changes to vessel and cutoff times to allow clients and their shippers to make any necessary adjustments to loading schedules. Customers will save money by being able to react immediately to rolled vessels and cutoff changes.

**Per Diem Management** – Steamship line per diem tariffs are monitored, and automated e-mail notifications inform clients prior to the free days expiring. Per diem fees are calculated and managed so that customers can make the most effective financial decisions regarding shipping and storage of containers.

**Ease of Use** – Booking and container information can be accessed via an online system or by using automated status reports.

Complete reporting tools, from online management boards to automatic status reports are included. Monthly and annual volume reports and transit time reports provide the information to manage cargo and steamship lines and make the most effective shipping decisions.

Get gwiTrack for free when you use Gulf Winds to transport your containers.

View all of your export bookings on one screen and check on their loading and delivery status. Don't guess when your containers are turned in, know it!

# Nationwide Shipping Management

By tracking shipments from origin to final destination, gwiTrack provides detailed monitoring, tracking and management tools for your nationwide container shipping. Important advantages of our services include:

**Single Point of Contact** – Throw away your complicated contact lists. With Gulf Winds Nationwide Shipping Management, you receive one point of contact for all of your shipments coming into the United States. We will keep you up-to-date using state-of-the-art technology and providing access to

an easy-to-use online dashboard allowing you real time access to your shipment status.

**Shipment Dispatching** – With Gulf Winds' management services, we can dispatch your shipments to transportation carriers using our extensive network of regional carriers or your own dedicated transportation providers as soon as your container becomes available.

**Comprehensive Tracking & Reporting** – Are you manually tracking your shipments on dozens of websites or spending hours a day managing shipments from multiple ports across the country? Let Gulf Winds save you time and frustration. With gwiTrack, your shipments are automatically tracked through the port, rail, and steamship lines across the entire United States.

With access to real-time dashboards and automated reporting tools, you can receive up-to-date information without the hours of work.

Also, with all of your shipment data in one place, Gulf Winds can provide you with extensive data analysis including volume and transit time reports.

*Partner with Gulf Winds and benefit from our industry-leading container drayage, transloading, warehousing, tracking, local and long-haul transportation, and customs examination services.*
